WORK EXPERIENCE

Application Developer

Zameen Af
Kabul, Afghanistan
APRIL 2017 – APRIL 2018

- **Requirement Analysis and Incorporation:** Created and integrated new requirements related to the design, development, and enhancement of organizational systems, aligning them with evolving business needs and objectives.

- **System Updates and Usability Improvements:** Implemented system updates focused on improving usability and functionality, ensuring that updates were in line with business decisions and user feedback.

- **API Development and Maintenance:** Developed and maintained APIs for third-party applications, facilitating seamless integration with Android and Apple products. Ensured APIs were robust, secure, and optimized for performance.

- **Collaboration with Stakeholders:** Worked closely with cross-functional teams and stakeholders to gather requirements and feedback, ensuring that system improvements met organizational needs and enhanced overall efficiency.

- **Technical Documentation:** Created comprehensive technical documentation for new features and updates, providing clear guidelines for future development and maintenance.

- **Quality Assurance:** Conducted rigorous testing of system updates and new features to ensure they met functional requirements and were free of critical bugs or issues before deployment.
